LinkedIn | GitHub | LeetCode | CodeChef

SUMMARY

B.E. Computer Science student (graduating September 2028) seeking a Java Backend Development Internship. Hands-on experience building web applications with Java, Spring Boot, JSP/Servlets, JDBC and SQL using MVC architecture, gained through two internships and project work. Solved 200+ DSA problems on LeetCode and CodeChef.

EDUCATION

Qualification	Institution	Years	Score
B.E. in Computer Science (Lateral Entry)	Bangalore Technological Institute, Bengaluru	09/2025 – Present	8.2 CGPA
Diploma in Computer Science & Engineering	Mahamaya Polytechnic of Information Technology, Aligarh	09/2021 – 09/2024	70%

TECHNICAL SKILLS

Languages: Java (Core, OOP, Collections, Multithreading basics), SQL, Python, JavaScript
Backend: Spring Boot, Spring MVC, Spring Data JPA / Hibernate, REST APIs, JSP, Servlets, JDBC
Databases: MySQL, PostgreSQL
Testing & Build: JUnit, Postman, Maven
Tools & DevOps: Git, GitHub, Docker, Linux, AWS (EC2 basics)
Frontend: HTML, CSS, React (basic)
Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Java Development Intern — NativeSoft Tech (Remote) *12/2024 – 02/2025*

- Built student records management module in Java using JDBC / Spring Boot and MySQL
- Refactored user authentication middleware to reduce page load time by 35%.
- Fixed 15+ bugs through debugging and unit testing; managed code with Git branches and pull requests

SQL Intern — RD Infro Technology (Remote) *12/2024 – 01/2025*

- Wrote 30+ SQL queries using joins, subqueries, GROUP BY and window functions for reporting on transactional sales and customer order data.
- Cleaned and normalised 10,000+ records across 12 tables, removing duplicates and handling null values
- Created indexed SQL views to automate month performance reports

PROJECTS

Food Ordering Management System | Java, Spring Boot, Spring Data JPA, MySQL, REST APIs | *09/2025*

- Built REST APIs for menu browsing, cart, order placement and order tracking, with 12+ endpoints
- Implemented role-based login (customer/admin) using Spring Security + JWT / session authentication with hashed passwords
- Designed a normalised MySQL schema of 8 core tables; added an admin panel for menu, order and user management
- Wrote JUnit tests for the service layer and documented APIs with Postman / Swagger.

Clinical Insight Engine | Python, scikit-learn, Flask/FastAPI, React | *09/2026*

- Built a full-stack clinical decision-support system that flags early diabetes risk from routine patient data, including age, gender, hypertension, heart disease, smoking history, BMI, HbA1c, and blood glucose.
- Trained an interpretable Logistic Regression model on the Kaggle Diabetes Prediction Dataset, exposing predictions through an Express.js REST API.
- Designed dual-view React components providing feature contribution charts and confidence indicators for clinicians alongside plain-language risk summaries and preventive guidance for patients.

Spam Email Classifier | Python, scikit-learn, NLTK | *11/2026*

- Classified emails as spam/ham with 98% accuracy on the SMS Spam Collection dataset of 5,500+ messages.
- Preprocessed text using tokenization, lemmatization, and TF-IDF vectorization; evaluated Naive Bayes and SVM models using precision, recall, and F1-score metrics.

TRAINING, CERTIFICATIONS & ACHIEVEMENTS

Java with JSP Training — Arcane Programming (Remote) 07/2023 – 09/2023

- Built dynamic web applications using JSP, Servlets and JDBC following MVC architecture

Solved 250+ DSA problems on LeetCode and CodeChef
Postman API Fundamentals Student Expert *Sep 2025*
Advance Java Skills Up | GeeksforGeeks *Apr 2026*
Data Base Management System | NPTEL (IIT Kharagpur) *Apr 2026*
